PROGUARD SNEEZE/VIRUS PROTECTION SCREEN

Exclusive to Prosol UK – The ProGuard Sneeze/Virus Screen has been designed to provide essential protection for customer facing employees. Designed and manufactured in the UK from premium materials.

An anthracite*, powder coated, steel tube frame incorporates a PET or Acrylic transparent screen to give a robust and extremely stable virus protection screen.

An unique feature of the ProGuard Sneeze Screen is that it can be adjusted to suit the application required.

The frame can be set at desk level for complete isolation from others, such as staff interaction. Or with a 15cm gap at the bottom to enable documents, payment terminals or keys to be passed to and from customers.

The transparent screen panel is removable for easy cleaning or replacement.

Dimensions:

External: 1,070(w) x 765/915(h)mm – 19mm square steel tube frame.

Foot Plate: 250(l)mm x 19mm square steel tube frame.

Transparent Panel: 1,000(w) x 750(h)mm

**Need a different frame colour? For quantity orders (100+ we can produce any RAL colour reference.)*

COVID-19 AWARENESS & CONTROL POSTERS

COVID-19 Coronavirus - LET'S TACKLE IT TOGETHER
Protect Yourself And Others Against Infection

Wash your hands regularly please

Prevent The Spread

CATCH IT
Cover your nose and mouth with a tissue or use the back of your elbow in emergencies.

BIN IT
Germs can live for several hours on tissues. Dispose of used tissue in the nearest bin.

KILL IT
Hands can transfer germs to every surface you touch. Wash your hands thoroughly and avoid touching your face at all times.

Keep Hard Surfaces Clean
Clean and disinfect frequently touched objects and surfaces in the home and work environment. Avoid touching your eyes, nose, and mouth with unwashed hands.

Greeting People
Please avoid handshakes - there are new and safer ways to greet each other without touching them: bumping elbows or fists, tapping feet or simply waving hi.

Please Keep Your Distance
At all times maintain at least 2 metres (6 feet) distance when communicating with others, particularly if they are coughing or sneezing.

Why? When someone coughs or sneezes they spray small liquid droplets from their nose or mouth which may contain virus. If you are too close, you can breathe in the droplets, including the COVID-19 virus if the person coughing has the disease.

Some studies on other coronaviruses, including SARS and MERS, found they can survive on metal, glass and plastic for as long as nine days, unless they are promptly disinfected.

Part No. CDP719 - COVID-19 Safety Awareness Poster

COVID-19 Safety Awareness Poster

As part of our commitment to social responsibility at Prosol U.K. we have designed and produced the FREE A3 COVID-19 Safety Awareness Poster for all our customers and fellow Motor Trade colleagues.

We are supplying this poster FREE OF CHARGE to all customers placing orders with us until further notice. If you don't require any Prosol products at this time you can still get your FREE copies which are supplied in packs of 10 (delivered to one address) and only pay £6.90 + VAT for post and packing.

These posters can be displayed with our A3 Snap Frames (see below) and are available at the reduced price of £4.90

Alternatively you can order the downloadable PDF version for FREE and print it yourself.

PYRAMID SIGN - DO NOT ENTER THE WORKSHOP

This sign gives clear instruction to visitors not to enter your workshop unless invited. Incorporates 2 eyelets so that Barrier Chain can be clipped to it (Barrier Chain and Wall Hooks available separately) and then to either side of the entrance. Creates a highly visible warning and a physical barrier if deployed with plastic chain.

Manufactured from durable Polypropylene, the base can be filled with sand or water to improve stability.

Also available with an alternative message, to prevent people interrupting MOT Tests – Part Number: DNI7590

If you already have a “Do Not Interrupt The Tester” pyramid sign (Part No: DNI7590) we can supply the “Do Not Enter The Workshop” graphic as a self-adhesive sticker for you to apply to the reverse side.

Dimensions:
Height: 1160mm
Width: 370mm
Weight: Empty 2.2kg – Full 7.7kg

TOUCH SCREEN FRIENDLY Manual Handling Workshop Gloves – Red PU

TOUCH SCREEN FRIENDLY Manual Handling Workshop Gloves are palm and fingertip coated with a revolutionary polymer called PolyMAX™ so that you can work with touchscreens without removing the gloves.

TOUCH SCREEN FRIENDLY workshop gloves are extremely durable having passed the highest test rating for abrasion resistance according to the EN388:2016 standard. A 15 gauge seamless Nylon and Spandex knitted liner and wrist gives a snug “second-skin” fit for superb dexterity combined with excellent breathability and comfort. The PolyMAX™ coating offers good resistance to oil and water repellence for improved grip to reduce slips and aiding hand fatigue.

TOUCH SCREEN FRIENDLY Manual Handling Workshop Gloves – Red PU comply with the following standards: EN388:2016 (4131X) / EN420:CE

Available in the following sizes: 10 & 11

CODE	DESCRIPTION	PRICE per pair	10 pair pack

WATERPROOF Manual Handling Workshop Gloves

Our WATERPROOF Workshop Manual Handling Workshop Gloves are dual coated with latex and have a sandy palm finish for good grip in wet or dry conditions. These waterproof workshop gloves have passed the ISO:15383 test requirements for water resistance.

Manufactured with a 13 gauge, black polyester, liner and knitted wrist to improve wearer comfort. The dual latex coating also provides improved thermal properties, so they're warm to wear in colder conditions.

WATERPROOF Manual Handling Workshop Gloves comply with the following standards: EN388:2016 (2141X) / EN420:CE

Available in the following sizes: 8 / 9 / 10 & 11

NITRILE GLOVES

Our Nitrile Powder-Free Gloves are made of nitrile butadiene rubber (NBR) and conform to BS EN 420 AQL 1.5, offering much better resistance to chemicals and puncturing than both the Latex and Vinyl options.

Being both Latex and Powder Free means they are better suited to those having suffered from skin sensitization with other gloves.

It is recommended to check that the gloves are suitable for the intended use because the conditions at the workplace may differ from the type test depending on temperature, abrasion and degradation.

These gloves are particularly suitable for areas with low biohazard risk.

Single use only.

Supplied quantities of 100 ambidextrous gloves per box in Large and Medium sizes and quantities of 90 ambidextrous gloves per box in Extra Large Size.

Due to current supply situation we are limiting customers to 6 boxes per order

HAZARD WARNING MARKING TAPE - ECONOMY

The quick and easy way to identify hazardous areas and differing floor levels around Vehicle Lifts and Brake Testers – or for social distancing markers.

Please Note: On dark coloured floors, two or more layers of this tape may be required to achieve a dense pattern.

Self-adhesive PVC tape – 33 metre x 50mm roll.

For a better quality result and improved durability please see our Premium Hazard Warning Floor Tape, **part number PWT5335**.

HSE recommend that a 100mm wide band is needed to demark differing floor levels, therefore you should apply two widths of tape.

Or alternatively we have a 200mm wide, yellow and black chevron, hazard warning tape available **HWT2003**.

CODE	DESCRIPTION	PRICE (per roll)
HWT5033	33 metre x 50mm roll	£ 4.76 + p&p + VAT
HWT2003	33 metre x 200mm roll	£29.75 + p&p + VAT

HAZARD WARNING MARKING TAPE - PREMIUM

New to the Prosol range of floor marking tapes is this Premium Grade Hazard Warning Floor Tape. Manufactured in the UK this hazard warning tape is quite simply the best of its type and is perfect for highlighting hazardous areas or social distancing. The high density printed PVC film is backed with a solvent based rubber resin adhesive to provide excellent adhesion and abrasion resistance.

The Premium Grade Hazard Warning Floor Tape exhibits long term adhesion to rough surfaces and has a bright and very dense yellow and black chevron pattern. Having a long and successful track record in all industry sectors it is widely used for marking out potential hazards such as; equipment dangers, changes in floor level, steps, walls and other areas that require safety warnings.

Designed for high traffic areas, the low stretch properties prevent shrink back or peeling once applied.

Size: 50mm(w) x 33M

MCKINNON MOULDED FACE MASK – SINGLE USE

The McKinnon Blue Moulded Surgical Face Masks are a simple physical barrier for short term use. Ideal for visitors to your premises they are a low cost, non-rated, mask that will minimise the potential for cross infection. The combination of a fiberglass-free material with a latex-free elastic band ensures these masks are hypoallergenic – they have a soft flared edge and adjustable nose piece for a comfortable fit. BFE (Bacterial Filtration Efficiency) is rated at around 90% at 4.2 microns (similar to an FFP1 mask) to provide primary barrier filtration.

Supplied in boxes of 50 masks.

Limited availability.
